**DETAILED ACTION**

Receipt is acknowledged of the amendment filed 11/27/2007.

The rejections under 35 USC 112, first and second paragraphs are hereby withdrawn in view of applicant's amendments.

The indicated allowability of claims 1, 3-7 is withdrawn in view of the newly discovered reference(s). Rejections based on the newly cited reference(s) follow.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-16, 18-32 and 53-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Biegajski et al (US 5,700,478) .

Biegajski et al discloses a mucoadhesive drug delivery device wherein the polymer contain the drug to be delivered (see Abstract, col. 35, line 30). Eudragit (polymethacrylate) copolymers (col. 22, line 15) and Carbopol 934 (col. 28, lines 40-45) are taught for use in the adhesive layer and are pH-sensitive. These polymers are crosslinked with polyalkenyl ether or divinyl glycol. Polymer weight percentages are taught at col. 8, line 50. The mucoadhesive layer may be a copolymer of methacrylic acid esters with diethylaminoethyl methacrylate (col. 33, line 55-60). The adherence of the drug delivery system to the mucosal site is set out at col. 5, line 25 to col. 6, line 30). The instant claims are anticipated by Biegajski et al.
